

## Homeopathic Imprint Remedy/Tincture

The CUSTOM remedy is made based on the scan results. These are custom to your client's results. This is an Energetic Sealer so to speak.

This makes the body remember the frequency adjustments given by the scan. Have your client succus the remedy 40 times on the palm of the hand when they first receive it then succus a few times each time they take it. This allows and supports the Kinetic and electrical flow when "hitting/succussing" the product in to the palm of the hand.

Take drops under the tongue in an empty mouth- are of foods or liquids. Coffee and mints including mint toothpaste can/will Neutralize a homeopathic. For this reason ideally take 1 hour away from those items being in the mouth. If you have a hard time counting the drops take a small glass / dixie cup with a bit of water in it. Be sure to count the drops in to the glass/cup. Consume that small "shot" of water all at once. All homeopathic and Custom Imprint Tinctures can be taken at the same time. This "small" cup method will ensure proper intake of drops.

Each Imprint Tincture will have instructions on the label. Including the #of drops to be taken 2 x per day and for how many weeks. When the number of weeks has ended toss out the remedy, for its effectiveness is no longer viable. Meaning....there is no value left.

*Feel free to offer this document to your clients as a supportive tool on their journey to balanced health.*

Make it an EPIC day,
