

Bio Genesis / Scans FAQ and Tips

IMPRINT / Remedy Tincture

If you choose to have a Physical Imprint into the Remedy Tincture they are \$25.00 each (plus \$5.00 shipping and handling fees) and appropriate scan results are put in to the Physical Imprint mailed to either Client or Practitioner. We suggest you charge \$35-\$45.00 per imprinted remedy bottle.

FAQ:

1- What are Imprints / Tincture Remedies? These are customized drops created from the Scan results. In essence we are creating an Energetic Imprinted remedy that will aid the body in balancing and correcting itself based on the scan findings. The imprint is put in a 1 ounce amber bottle (typically) and dosage instructions vary. The instructions are placed ON the sticker of the bottle and can be any number of Drops per day and for up to 6 weeks. Even if drops still remain in the bottle there is no need to continue usage.

2- Can a Remedy be purchased “later”? Yes a remedy can be purchased later-within 2 weeks of results at the same fee schedule \$25.00 per Remedy Imprint.

3- How often do you recommend a New scan be done? Corporate training suggests within 3-6 weeks of initial scan and protocol, another scan would be beneficial. If you are using the Des Bio detox kit, these take 8 weeks to complete. We suggest a scan no earlier than 8 weeks and up to 4 months depending on Protocol and products used.

4- What is considered “core” scans? The Comprehensive Analysis / Baseline, Causal Factors/ Stressors scan, Food Sensitivity/Environmental Stressors, / ScansCo-Infections/Viral, Bacterial, Mold signatures and Nutritional/Reproductive Health. So **5 scans** completed on everyone are considered the CORE scans.

5- Optional- Protocol suggestion includes products populated by the scan for your review in the course of your care plan. It does not include dosage, time allotment, etc. We do not know your client! We are not the practitioner. (fee based service)

6- Optional- Mentoring on how to dose, suggest, create customized protocol is available. This will help you get results and success for your client. (fee based service)

TIPS:

- 1-** Always put your client/yourself on a Drainer or Detox support. This enables the synergy of all supplements to work and have less “herx response.”
- 2-** Never use more than 8-10 Physical supplements -at that point “stress” on the liver will become a tipping point for other issues to present / manifest.
- 3-** We suggest a 2-4 month Protocol with each scan. Many Practitioners will scan after 4-6 weeks and not offer 2-4 months of success strategies to the client. Only you know your client and your needs. However, be mindful of information overload versus effective protocol results.
- 4-** Once received the scan results are provided to you via email within 3-5 days. Please schedule accordingly with your client.

We are blessed and EPICALLY excited to be your Partner in delivering timely scan results in order for you to Positively Impact this World.....naturally.

Warm Regards
